

## **Definitions**

### Occupational Health

"Assessing and advising on the effect work might have on employee's health and what effect an employee's health might have on his/ her work"

#### □ Health Surveillance

"Process of strategies and techniques to detect symptoms of work related ill health to employees exposed to specific health risks during the course of their work"

# Risk Assessment

#### Two ways of tackling the health risk assessment:

Assess by activity and incorporate the potential health risks into your normal risk assessment format and identify the required control measures

#### OR

Assess by occupation/ trade and incorporate the potential risks into a trade specific risk assessment and required control measures.

#### HEALTH ASSESSMENT MATRIX

#### MET TO DOMBIE

- A PERSONAL PROPERTY OF THE PROPERTY OF THE STATE OF THE PROPERTY OF THE PROPER

# **Health Risks**

- Hand arm vibration
- Noise induced deafness
- Skin Disorders
- Respiratory Disease (various)
- Musculoskeletal Disorders
- Work Related Stress
- Safety Critical workers

# Health Surveillance??

Aim: To have a range of strategies and techniques in place to detect signs and symptoms of work related ill health at an early stage and act on the results. It is not an end in itself but shows whether control measures are working

- Certain activities already require surveillance to be carried out
  Asbestos at Work; Control of Lead; Work in Compressed Air.
- For the other risks the burden of proof is on us to show that there is no significant residual risk to health after the control measures have been applied.

# 100

## Health Surveillance is needed

HAV – If exposure action value of 2.5ms<sup>2</sup> is exceeded and where the exposure limit value of 5.0ms<sup>2</sup> is exceeded.

Noise – If regularly exposed to noise over the exposure action level of 85 dB(A)

Burden of Proof Question: Can you prove that your employee is not exceeding these legal levels?

# 100

## Health Surveillance is needed

Skin Disorders – COSHH requirement that exposure to any agent known to cause skin damage would require surveillance skin checks. (R43 Risk Phrase: May cause sensitisation by skin contact)

Respiratory Disease – Where workers are exposed to substances and processes where occupational asthma is a known problem (R42 Risk Phrase: May cause sensitisation by inhalation)

Silica levels above 0.1mg/m<sup>3</sup>.

Chronic Obstructive Pulmonary Disease: cause by smoking, coal dust, silica, grain, wood dust, metal fumes

Burden of Proof Question: Can you prove that your employee is not exceeding these legal requirements/ levels?

# M

## Health Surveillance is needed

Safety Critical Workers – "where the ill health of an individual may compromise their ability to undertake a task defined a safety critical, thereby posing a significant risk to health and safety of others"

In construction the following have been defined as safety critical: Hi speed road workers

All mobile plant operators

<sup>\*</sup> Occupational Health Standards for the UK Construction Industry

# Occupational Health Service Providers

- Competence checks on service provider
- Confirm individual competency levels usually current registration with the Nursing and Midwifery Council, as a minimum.
- Obtain a specific service level agreement in conjunction with your health assessment requirements.

## Other issues to be aware of

- Pre placement requirements/ Questionnaire vetting
- Disability Discrimination
- Work Related Stress
- Alcohol and Drugs
