Construction Health Risk Toolkit (CHeRT)

Background

HSE commissioned HSL to develop and pilot a health risk management self assessment tool

Purpose – organisations able to identify their current level of occupational health management.

CHeRT is designed as a vehicle for HSE VO to engage contractors on ill health issues

How to Use the Toolkit

- 3 step approach
- Step 1 : Identify organisations
- Step 2 : Meeting arranged with VO and Company
- Step 3 : Self Assessment and Action Planning

Four Key Areas – Question Set

Toolkit discussion about the four key areas:

- Commitment
- Management
- Involvement
- Evaluation

Outline Question Set

Commitment

1. Leadership
2. Policy
3. Planning

Management

4. Arrangements
5. Risk Control

Outline Question Set

Involvement
