

Trusted Training
& Compliance

Consultancy Services

Product Overview

At TTC we realise that no one size fits all! With hundreds of years of experience within the team, we can provide a range of consultancy services to meet your diverse needs.

The team is passionate about achieving success for their customers and making a real difference to both businesses and individual drivers to remain safe and compliant out on the road.

The impossible is the possible! While this document is very specific, the range of solutions available is considerable.

Services available

**Fleet safety
review**

**Post collision
interviews**

**Driver
handbook**

**Bespoke course
development**

Fleet Safety Review

A thorough review of current risk management practices in place, benchmarked against industry best practice to maintain full health & safety compliance. A great starting point for many customers knowing they could do better and wanting to make a start and receive some guidance.

The output is an 80+ page report detailing a plan of action and effort required to achieve the desired results, which can be shared with any Board of Directors to make an informed decision on how best to proceed.

Post Collision Interviews

Any collision is an expense and potential injury or near miss for an employee. Our interviews support management through an independent process of reviewing the collision and offering support to drivers. It is not a process to establish blame, but to identify trends in collisions and implement clear and warranted mitigation solutions.

Driver handbook

Often linked with our Fleet Safety Review where we gather essential information, our driver handbook provides drivers with access to important road safety information bespoke to the customers policies and procedures. All accessible via the TTC Continuum.

Product development

With over hundreds of training products available from eLearning and road safety videos to in person training, there are times when a customer wants a specific course to meet their needs.

Our team of product developers have created a wealth of bespoke practical and workshop-based courses for customers from tractor drivers spraying crops to construction workers building the HS2 railway. In addition, we have created eLearning solutions from government agency staff escorting hazardous loads to bespoke driver inductions.

Using a full L&D approach, we work with customers to identify the requirements and desired learning outcomes and how we can achieve those given the time and budget available.

A truly collaborative approach every step of the way from design to sign off.

Benefits

- Access to a wealth of industry experience
- Bespoke training solutions to address targeted needs
- Solutions integrated into TTC Continuum risk management platform
- Solutions integrated into customer's own policies and procedures
- Supports driver and vehicle compliance
- Provides an all encompassing suite of services

Logistics

Discuss your requirements with our consultancy team to view previous projects and to consider the options available and any subsequent proposal.
